Tittle: Text update in login page
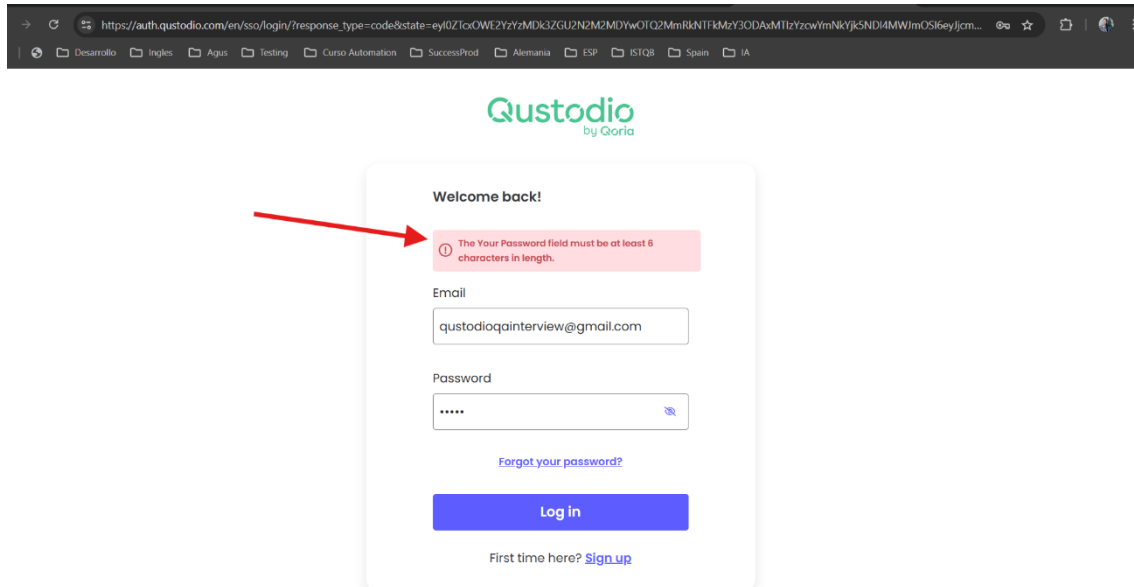

Description: When the user is trying to login and use a short password it shows an alert message "The your password field must be..." "The" is redundant. Not needed. The field is actually called: Password.
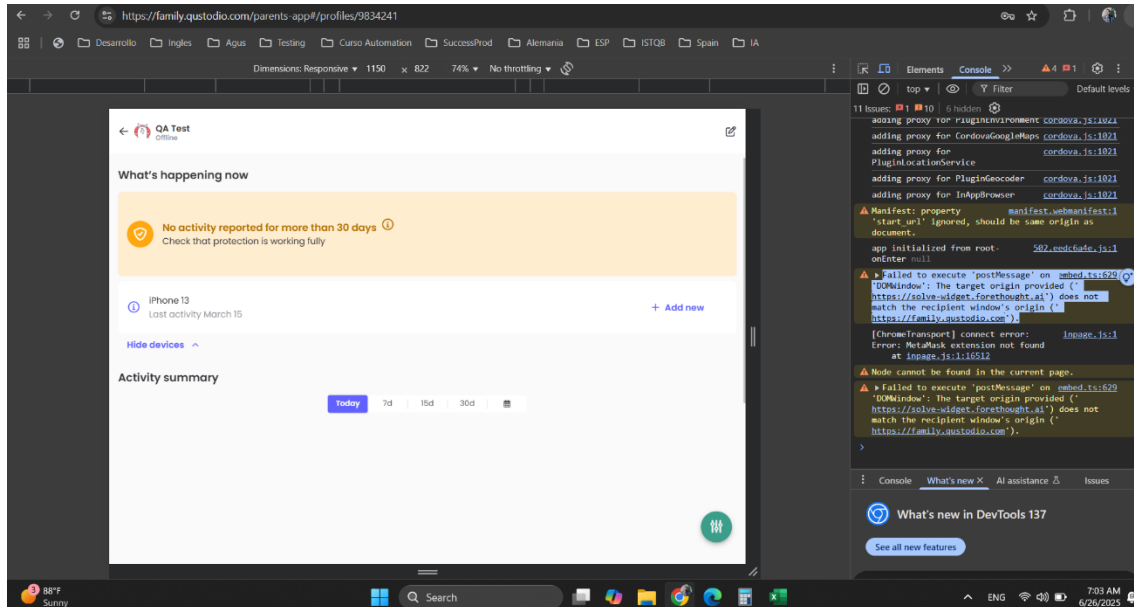

Actual Result:

Steps to reproduce:

1. Go to login page
2. Add a short password ex" 11"
3. Click login

Browser: Chrome

Tittle: Problem using post message when you access any profile on website.

Description: When click on any profile created in the app, there is a message in the console indicating a problem related to execution of postmessage. Is trying to send a message but url is not matching.

Actual results:

Error message:

 mbed.ts:629 Failed to execute 'postMessage' on 'DOMWindow': The target origin provided ('https://solve-widget.forethought.ai') does not match the recipient window's origin ('https://family.qustodio.com').
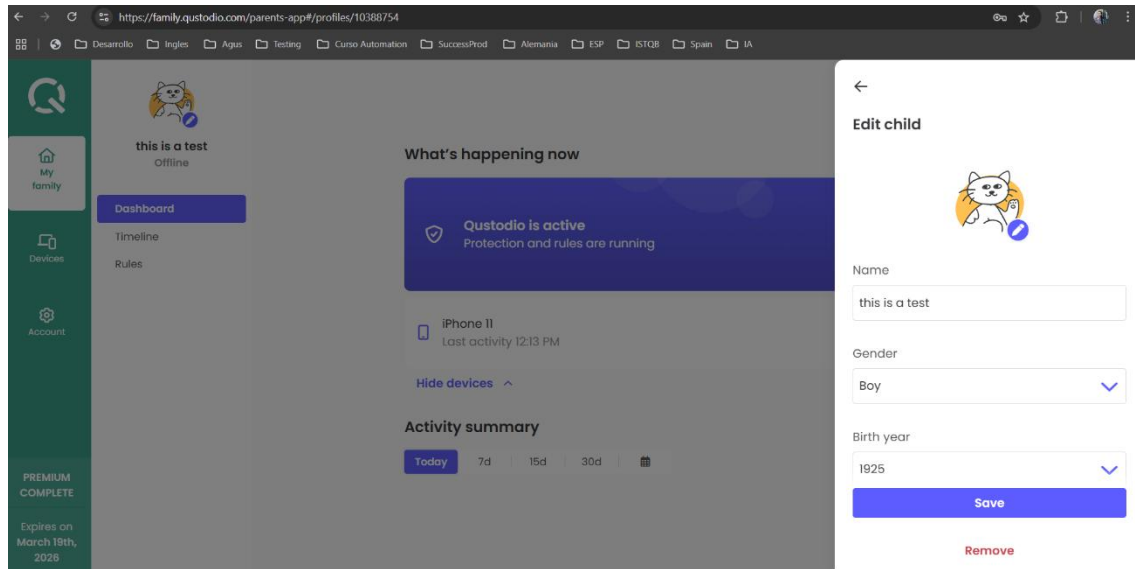

Steps to reproduce:

1. **Access to the app**
2. **Clcik in any profile**
3. **Open console**

Browser: Chrome

Tittle: Birthday field let the user select a wide range of ages.

DescriptionWhen creating or updating a child's profile, the birthdate field currently allows selecting any year, including unrealistic values. It should be restricted to a valid age range based on the intended audience of the app (e.g., 0–17 years old).

Actual results:

Steps to reproduce:

1. **Go to to add a kid**
2. **Go to birth year field**
3. **Open the dropdown and pick any date ex: 1925**

Browser: Chrome
